Profile

- I'm a developer with over 3 years of experience specializing in Node.js, React.js, and PostgreSQL. I thrive in teamwork and have successfully integrated OpenAI, third-party WhatsApp, and TMDB APIs. My standout moment was completing a difficult project on a tight deadline, where I developed a React Native webview for both Android and iOS with multiple environment facilities, integrated push notifications using Firebase FNM, and successfully uploaded the iOS app to TestFlight, enhancing our team's efficiency and project delivery.

Skills

- React.js
- Node.js
- Postgresql
- Apollo Graphql, Ant Design
- Git
- K6 Automation
- Agile Methodology
- React Native
- Web Services
- Microservice Design
- Software Development Life Cycle
- Kafka Queue

Experience

- | | |
|---|---------------------|
| • Reliablesoft Technologies Pvt Ltd
Software Engineer
- Role: Full-Stack Developer
- Project: NetManager (Broadband Management System)
- Backend Focus: Proficient in Node.js development
- Shell Scripting: Possesses knowledge for scripting tasks
- Recent Achievement: Integrated WhatsApp with third-party vendor Rapbooster.com, optimizing communication workflows for clients | Oct-2021 - Dec-2024 |
| • Infoobjects Software Pvt Ltd
Software Engineer
- Role: Full-Stack Developer
- Project: Vriti.AI Intelligent Recruitment Process Platform Powered by AI
- Backend Focus: Proficient in Node.js and Nest.js development
- Recent Achievement: Handled work for two developers over the past two weeks to maintain project momentum while a teammate was occupied with another assignment. | Dec-2024 - Present |

Projects

- NetManager Smart Bandwidth Management Solution**
NetManager is a Broadband Management System (BMS) designed for Internet Service Providers (ISPs). Using React.js, Node.js, GraphQL, PostgreSQL, and MongoDB, it offers real-time monitoring, remote issue troubleshooting, billing, bandwidth management, and AAA solutions. It enhances network performance, reduces costs, and improves customer satisfaction.
- BMS Notify**
Developed a backend system providing APIs for sending emails, SMS, and WhatsApp messages. The project focuses on offering API services without a UI, allowing seamless message dispatch via third-party integrations.

- **Vriti.AI**

Vriti.AI – Subproject Contributions

Charting Library: Developed backend services for a dynamic charting engine that generates various chart types from Excel/CSV datasets.

Staging Application: Engineered backend logic for a centralized status management system with a global Kanban board to streamline project tracking.

Data Encryption Module: Implemented secure backend processes to encrypt sensitive database data using scheduled cron jobs.

AI Interview: Built frontend for AI interview platform.

Integrated WebRTC, Socket.io, media recording, and live transcription

Education

- **Jai Narayan Vyas University** 2019 - 2022
Bachelor of Computer Applications
 - **Bikaner Technical University** 2022 - 2025
Master of Computer Applications
-

Tools

- VS Code, Android Studio, Cursor.sh, Git, Postman, Datagrip, pgAdmin, Bitbucket, MongoDB Compass
